COVID-19 RISK ASSESSMENT

Everyone needs to assess and manage the risks of COVID-19. As an employer, you also have a legal responsibility to protect workers and others from risk to their health and safety. This means you need to think about the risks they face and do everything reasonably practicable to minimise them, recognising you cannot completely eliminate the risk of COVID-19.

- Who might be harmed and how?
- What you are already doing to control the risks.
- What further action you need to take to control the risks.
- Who needs to carry out the action?
- When the action is needed by.

With our competent CMIOSH – FIIRSM Risk assessors, we can carry out a risk assessment for your company.

PROTECT YOUR STAFF AND CUSTOMERS

Our contractors are able to design protective barriers and pods to fit any specification. We work with you from start to finish by manufacturing and installing to suit your needs.

SIGN DESIGN AND INSTALLATION

We can create signage for your company to explain new regulations, direct staff and customers, and show the public how you're following procedures to keep them safe.

KEEP YOUR WORKPLACE CLEAN

Our ozone machines are designed to thoroughly clean any and all areas within your workplace. We can even repaint your walls using antibacterial paint for peace of mind and increased safety.

HOW DOES OZONE HELP CLEAN YOUR WORKPLACE?

Ozone - considered a killer of viruses in nature - has been widely used for disinfection, sterilization, deodorization, disintoxication, storage, and bleaching thanks to its strong oxidability.

And because of this, ozone should be adopted as a weapon in the global fight against COVID-19.

Here's why:

THE 3 MAIN POINTS

FULL COVERAGE :

The ozone created by ozone generators or electrostatic air purifiers can reach every corner of the room they're in. This overcomes the problem of ultraviolet sterilisation - which can only be administered straight up and down, leaving some areas untouched.

HIGH DETERGENCY :

Oxidising bacteria and viruses is how ozone works, leaving behind no poisonous residue. Chemical disinfectants can be harmful to the human body and may leave behind a large population of poisonous residue.

CONVENIENCE :

Ozone can be produced by extremely simple equipment. Our various equipment sizes can be used for single rooms, large public spaces, or even public transportation such as buses, high-speed railways, ships, and airplanes.

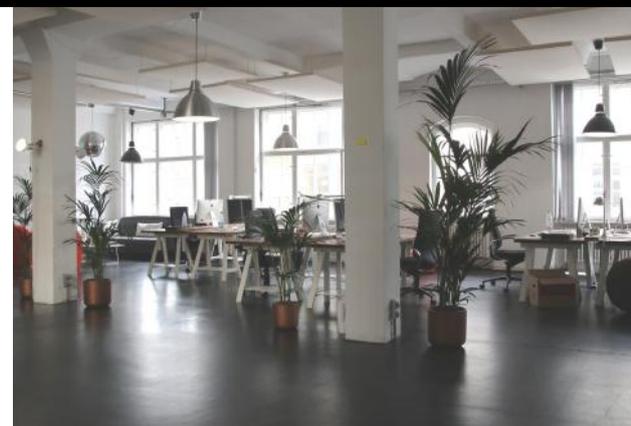

The National P3 Laboratory (headed by Professor Li Zelin) conducted experiments to determine how effective ozone is in killing the SARS virus. They determined a kill rate of 99.22%. Researchers found that the novel coronavirus (COVID-19) is 80% similar to the SARS virus in its genome sequences. It's reasonable to predict that ozone will be equally effective in preventing and controlling the new coronavirus.

The effectiveness of ozone in treating bacteria and viruses is not only related to its concentration, temperatures, humidity, and exposure time, but also the strain of bacteria.

Ozone, though highly effective for sterilisation and disinfection, can cause discomfort or irritate mucous membranes when it reaches a certain concentration level. Therefore, it is mainly used in unmanned environments.

PEACE OF MIND WITH PROFESSIONAL CARE OF DUTY

We've specifically designed these services to help businesses of all sizes adjust to the new normal. If you're confused about what you should be doing to re-open your business properly, get in touch with us and find out how we can help you get back to work in the safest and fastest way possible.

CUSTOM FIT PROTECTIVE BARRIERS AND PODS

PROTECT YOUR STAFF AND CUSTOMERS WITH WORKPLACE DIVIDERS

Proper workplace distancing is going to become a problem for many companies over the next few months. We're in this for the long haul and to get back to business as fast as possible, many of you will want to commission dividers/barriers/custom cubicles etc.

Our contractors are able to work alongside you every step of the way to design, manufacture, and install protective barriers and pods to fit any specification. We'll work with you from start to finish to ensure that the fit is perfect and all your needs are met.

FOLLOW GOVERNMENT GUIDELINES AND KEEP YOUR COMPANY RUNNING

For those of you who operate businesses which require staff to work on-site instead of home, these coming months are going to be tough enough as is. With a system like ours in place - using cutting edge protective barriers that are custom built - you can help ease some of the stress that will come during this transition period.

Investing in proper dividers (or visitation pods if you run a care home or similar facility) you're not just investing in the here and now - you're future-proofing your business against future outbreaks and other potential viruses.
